VT HACKS

Judging

Sunday Morning in New Classroom Building (NCB)

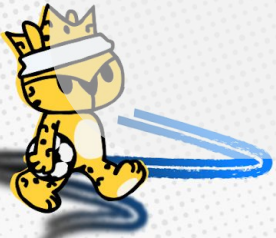

Submission Guidelines

**SUBMISSION DEADLINE: 8 AM, SUNDAY SEPTEMBER
20TH**

Up to 4 hackers to a team, up to 3 sponsorship tracks

- To be eligible for prizes, each hacker **MUST** be:
 - Registered
 - Checked-in
 - Present at closing ceremonies

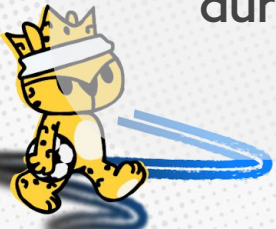

Sunday Morning

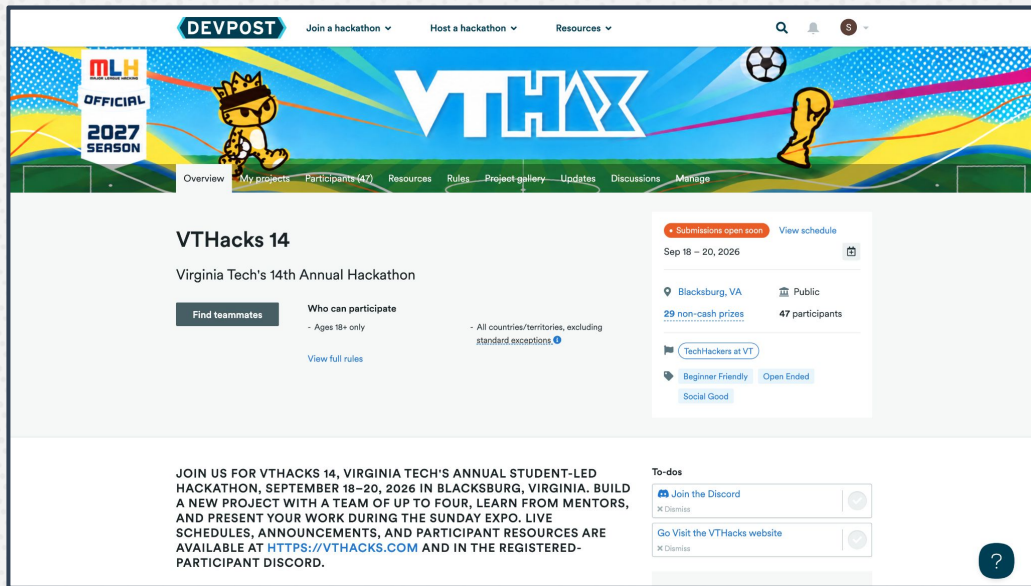

JUDGING BEGINS: 9 A.M. in New Classroom Building

Science Fair Presentation Style Judging

- Teams will be assigned a room for the duration of judging
- VTHacks Judges will come to your table to score projects
- Sponsor Judges will come to tables that submitted to their prize categories
- We ask that contributors to your project are present for the entire duration of judging

GoDaddy

Scott Courtney, VP Engineering

Category: Best use of ANS

Challenge: build agents that discover, verify, and communicate with other agents and services across the open web, using ANS for domain-anchored, verifiable identity.

Example directions, serious to absurd: agent-to-agent commerce and negotiation; verified ticket resale where buyer agents detect impostor sellers; a fantasy draft conducted entirely between team agents; cross-org scheduling; an impostor-detection CTF; agents playing Diplomacy where identity verification is the mechanic.

The best submission is one not on this list.

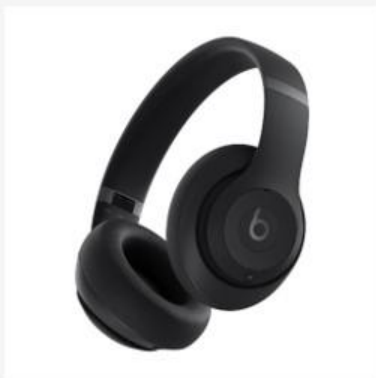

Prizes

1

1st Place:

- Energy Drink Pong, sponsored by Peraton – Saturday at 8pm

A photograph of a modern multi-story office building at night. The building features a large glass facade on the left side, reflecting the city lights, and a brick facade on the right. The Peraton logo is visible on the upper right corner of the building. The sky is dark with some stars visible. The overall scene is dimly lit, with the building's interior lights providing the primary illumination.

CLOUDFORCE × VTHACKS 14

ENTER HOKIEAI

Add a Side Kick to your hack. Post it. Win up to \$1,000.

THE ASK

BUILD YOUR HACK'S SIDE KICK

A tiny standalone HokieAI thing, in the spirit of your hack.

2–3 questions in, one personal result out.

No login to your hack. No hack required at all.

SEE IT IN ACTION

ONE REAL EXAMPLE

HokieAI

Side Kick result

YOUR STUDY HABITS DIAGNOSIS

SURVIVING ON VIBES AND CAFFEINE

I told it: Bio major, exam in 4 days, 3 hours of sleep, 4 cups of coffee. HokieAI's official diagnosis: "Medically speaking, you should be asleep. Academically speaking, you don't have time." Gave me a real 4-day study plan anyway. 10/10, felt attacked.

♥ 214 🔄 58 Comments 31

THEIR HACK

A FLASHCARD APP

Their Side Kick took 20 minutes, needed zero login, and got more likes than the hack demo. That's the whole game.

HOW YOU WIN

POST IT. SHOW IT LIVE.

Post early, anywhere your audience is. At judging, pull up your live post — real likes, shares, comments count.

Post on LinkedIn tagging @Cloudforce and @Virginia Tech

= +10% score

THE PRIZES

\$2,000 ON THE TABLE

MOST VIRAL

\$1,000

Split across the team. Highest real engagement, live at judging.

MOST INTERESTING

\$500

Split across the team. Judges' pick for cleverness.

RAFFLE

\$500

Split across the team. Every entry is a ticket.

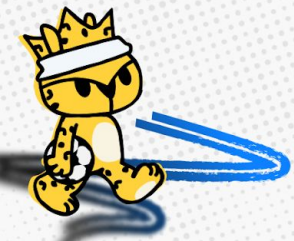

GO BUILD

YOUR HACK GETS A SIDE KICK

Everyone at VT can use HokieAI —
make something everyone wants to try.

**Thank you
Cloudforce!**

What Is Procedura?

- An experimental spatial conversational development environment
- Connects conversations, AI agents, code, tools, and live system state
- Organizes work inside persistent spatial contexts
- Keeps history and generated state durable and replayable
- Uses geographic buckets to connect digital content with real places
- Coordinates specialized agents through shared, structured state
- Projects verified results into browser maps and interactive applications
- For this challenge
 - Procedura resolves the address and authoritative building footprint
 - It coordinates the image-editing and 3D-generation workflow
 - It records the generated asset and its provenance
 - It returns the mesh to the map with a reproducible placement transform

What Is Scorched Nebraska?

- A persistent geospatial game world built with Procedura
- Transforms real-world places into explorable post-apocalyptic regions
- Combines map data, buildings, roads, terrain, imagery, and generated assets
- Uses geographic buckets to organize local environments and gameplay
- Supports AI-generated structures, characters, enemies, and narratives
- Maintains shared world state for maps, agents, and player interactions
- For this challenge
 - The redesigned building becomes part of the live game world
 - Its mesh must match the real footprint while reflecting its generated style

Photo to Map-Ready 3D Building

- Enter the building address
- Upload one or more building photographs
- Describe desired changes with an AI prompt
- Generate the redesigned building image
- Convert the image into a 3D mesh
- Automatically return the mesh to its real-world address
- Core challenge
 - Correct position
 - Correct scale
 - Correct rotation
 - Correct ground alignment

Automatic Placement and Fitting

- Geocode the address
- Match the authoritative building footprint
- Normalize mesh units, axes, orientation, and pivot
- Center and ground the mesh
- Test likely rotations for the best footprint alignment
- Prefer proportion-preserving uniform scaling
- Allow limited non-uniform scaling when necessary
- Validate footprint overlap and nearby collisions
- Store a reproducible placement transform
- Send uncertain results for manual review

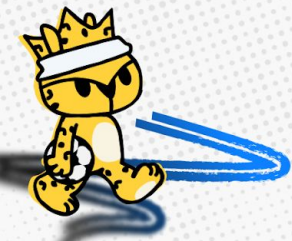

Prize

Internship opportunities for members of up to 2 teams

Thank you
Procedura AI!

Best Use of Nessie

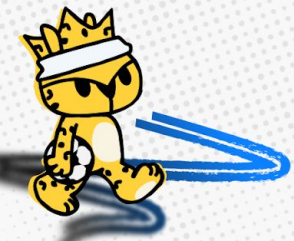

How will you
reimagine banking?

\$250 gift cards

from Giftogram, to
each member of the
winning team

Deloitte.

Deloitte.

databricks

VTHACKS 2026

databricks

Deloitte and Databricks have the strengths to help *accelerate data transformation journeys*.

It starts with Deloitte's breadth and depth of cross-industry, global delivery experiences in data modernization and advanced analytics.

That foundation is made even stronger with the Databricks Data Intelligence Platform.

Combined, the **Deloitte and Databricks alliance** helps organizations rapidly stand up a target-state data and AI platform that meets the needs of the business, keeping in mind both strategic and long-term goals.

Deloitte Engineering

Deloitte helps organizations solve complex challenges and achieve lasting results across industries

**DELOITTE IS A

- **Pioneered** a native trading platform for retail and private bank clients
- **Enhanced** account funding & position monitoring experiences

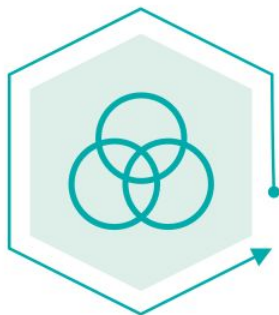

Databricks

The Databricks Data Intelligence Platform unifies data and AI workloads for rapid innovation

Built On Open Source

*Avoid lock-in to
proprietary system and
maximizes flexibility, use,
and adoption*

All Data Types

*Lakehouse allows for
structured,
unstructured, and
semi-structured data*

Native Governance

*Provides a single, secure
governance model to
manage all data assets*

AI Built Into The Data Layer

*Databricks combines data
management and AI
capabilities into one
cohesive platform*

Challenge overview & prizes

Step into the role of a Deloitte consultant and harness the power of the Databricks Data Intelligence Platform to design and **build an innovative Artificial Intelligence (AI) Agent to enhance the student experience at Virginia Tech**. Your team is invited to select one of the following focus areas and develop a creative, data-driven agentic solution:

Campus career navigator

- Build an AI agent that helps students discover internships, research positions, and full-time roles by analyzing their skills, coursework, and interests against real-world opportunities using Databricks.

Campus life intelligence hub

- Design an intelligent agent that unifies campus services (dining, housing, transit, events, and more) into a single personalized experience, using Databricks to surface insights and recommendations in real time.

Hokie smart campus

- Leverage Databricks to build a data-driven agent that identifies inefficiencies across campus operations—energy, safety, space utilization, or sustainability—and proposes actionable AI-powered improvements.

Judging Criteria*

Realism & Innovative Solutions

- Originality and creativity of the solution
- Realism of recommendations
- Effectively highlights the essence of a Databricks x Deloitte alliance through efficient use of Databricks technology and implementation of technology consulting / strategy
- Potential impact on the student experience

Content

- Technical execution and scalability
- Thoroughness of deployment roadmap and future enhancements

Presentation Delivery

- Team dynamics
- Ability to effectively demo and communicate solution
- Effective and Thoughtful Responses for Q&As

Best overall solution

JBL Speaker + Deloitte x Databricks Merch
